

## Kingsland Minerals: Quarterly Report June 2022

- **Kingsland Minerals (ASX:KNG) successfully lists on ASX and raises \$4.7m**
- **Assumes 100% ownership of exciting Uranium, Copper and Gold Projects in the Pine Creek region of the Northern Territory (NT)**
- **Directors conducted site visits to both Pine Creek and Lake Johnston Projects in preparation for upcoming exploration programs**
- **Drilling to commence shortly targeting Uranium and Gold in the NT. Mining Management Plans (MMP) for exploration programs submitted awaiting NT government approval.**

During the June 2022 quarter Kingsland Minerals Ltd (ASX:KNG) (Kingsland or Company) successfully raised \$4.7m and was accepted for admission to the official list of the Australian Stock Exchange (ASX). Shares in Kingsland began trading on 14 June 2022. The Initial Public Offering (IPO) raised \$4.7m through the issue of 23.5m shares at an issue price of \$0.20. The total undiluted shares on issue at the date of listing was 37.4m with KNG having a Market Capitalisation of \$7.5m and an Enterprise Value (EV) of \$2.7m.

Kingsland has accumulated an exciting package of tenements in the Northern Territory and Western Australia that are highly prospective for Uranium, Copper, Gold and Nickel. Exploration will commence shortly in the Northern Territory and Western Australia. Approvals to drill have been obtained for the Lake Johnston Project in Western Australia and are in the application process for projects in the Northern Territory.

### **EXPLORATION ACTIVITIES**

#### **Allamber Uranium Project**

A Mining Management Plan (MMP) for exploration activities at the Allamber Uranium Project has been submitted and is awaiting government approval. An initial drilling program totalling 4,700m is planned at Allamber. The focus on this program is to confirm historical drilling intersections and to provide information to enable geological and structural interpretations of the Uranium mineralised zones. Approximately 800 meters of diamond core drilling is included. Drilling will be focussed around the Cliff South area with some holes to be drilled at Twin and Dam to provide geological information. Figure 1 shows the Allamber Uranium prospects where the proposed drilling will take place. This figure also shows historic drilling collar locations. It should be noted that the assay data

for the Total Energy Australia drillholes is incomplete and the Atom Energy holes were drilled to a maximum depth of only 60m. This drilling program is planned to be completed during the September 2022 quarter with initial assay results available later in the quarter and into the December 2022 quarter. Following receipt of all assay results, additional drilling programs will be planned to extend mineralised zones along strike and at depth.

## Woolgni Gold Project

A program of six diamond core drill holes has been approved for the Woolgni Gold Project. These holes will be focussed on confirming historical drill hole intersections drilled in the 1980's. Mineralised zones delineated by historic old workings dating from the early 20th century and then by drilling in the 1980's will be further tested for gold mineralisation. The diamond drilling will provide structural information to enable the orientation of mineralised quartz veins to be established. This will be important when planning the next phase of drilling.

A high resolution LIDAR (light detection and ranging) survey over the Allamber and Woolgni Projects will be flown early in the September quarter to provide accurate DTM (digital terrain model) surfaces. This is in anticipation of future Mineral Resource estimations on these projects pending successful exploration outcomes.

## Lake Johnston Nickel Project

The Lake Johnston Nickel Project was drilled in the early 2000's targeting nickel and cobalt mineralisation. The historic tracks to these drilling locations were re-established during the quarter enabling access for exploration activities. A site visit is planned during the September quarter to ground truth historic exploration and to finalise future exploration plans.
